

IMEC (Marie Coble) with "Friends"
September 10, 1984

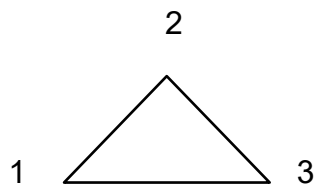

Session 15: 1,2,3,4, Creation

Original Question: There are two sexes male and female does this exist in other planes of reality? Are there differing energies?

Summary: The concepts of male and female are used as examples of the opposite energies that have joined to create, manifest a continuance. We have a limited view of realities. Realities are constantly being created. The Friends see the whole of reality. When two energies are attracted to each other and make contact a result is produced.

Extended Summary: There are two sexes, male and female, does this exist in other planes of reality? Are there differing energies? The concepts of the male and female is the opposite energies that have joined to create, manifest a continuance. This is a unique state, but we have a limited view of realities. Realities are constantly being created. We see the whole of reality. When two energies are attracted and make contact a result is produced. An example of this is a sperm and egg. If you visualize a triangle labeled with the three points: 1, 2, and 3. Number 1 is the sperm, number 2 is the egg, and number 3 is the potential creation of number 1 + number 2. If a result happens then in this case there is a child, number 4. A child then can learn to create and would become a number 1 or a number 2. Another example is the communication of thoughts. If I, number 1, attempt to communicate a thought to you, number 2, and you understand the communication of the thought then a number 3 is created. This is the potential of action from the communication. If the thought is accepted and used then there is influence that is the result, a number 4, of you and I communicating. The creation and acceptance of a thought shapes reality. Peace can be achieved on the Earth plane. Realities are simply what they are.

An example of this is a sperm and egg. If you visualize a triangle labeled with the three points 1, 2, and 3.

1 is the sperm, 2 is the egg and 3 is the potential creation of 1+2. If a result happens then in this case a child which is number 4. A child then can learn to create and would become a 1 or a 2.

Another example is the communication of thoughts. If I, number 1, attempt to communicate a thought to you, number 2, and you understand the communication of the thought; then a 3 is created. This is the potential of action from the communication. If the thought is accepted and used, then there is influence. That is the result (4) of you and I communicating. The creation and acceptance of a thought shapes reality.

Peace can be achieved on the Earth plane. Realities are simply what they are

Comments: The concepts on this tape are interesting yet difficult to clearly understand.
